PROFILE SUMMARY

Frontend developer with 5+ years of experience building scalable web and mobile apps using React.js, React Native, and TypeScript. Focused on performance, clean architecture, and delivering seamless user experiences. Proven ability to reduce bugs, improve load times, and mentor junior developers.

SKILLS

React.js | **React Native** | **JavaScript** — ES6, Jquery | **Typescript** | **Next.js** | **Redux** | **Context API** | **HTML** | **CSS** | **Bootstrap** | **Tailwind css** | **Ant Design** | **Material UI** | **Figma** | **Rest API** | **GraphQL**

PROFESSIONAL EXPERIENCE

Senior Software Engineer, *Loch Inc (Tradefox)* 06/2025 – Present

Tech Stack: React.js, Next.js, Tailwind CSS

Product: Prediction market trading platform (Polymarket & Kalshi)

- **Led frontend development from scratch as the primary developer in a 2-engineer team**, building a real-time prediction market platform integrated with Polymarket and Kalshi, with a focus on performance and scalability
- Architected a scalable Next.js application and **built an in-house component library**, driving reusable UI, efficient state management, optimized rendering, and improvements across authentication, SEO, and analytics

Senior Software Engineer 1, *FYERS* 02/2023 – 05/2025 | Bangalore, India

Tech Stack: React.js, Next.js, Redux, Context API, HTML, CSS, Tailwind CSS, Bootstrap, Ant Design, REST APIs, Flutter

Products: Trading Platform, Onboarding platform, account management, internal admin portal, IPO & debt platforms, internal dashboards, etc

Senior Software Developer 1

04/2025 - Present

- Built and optimized a large-scale onboarding platform and admin portals with **React.js, TypeScript, Ant Design, Bootstrap, and REST API integrations**. Created a **reusable, component-driven design system** that enhanced scalability, responsiveness, code quality, and cross-team development efficiency.

Software Developer 2

02/2024 - 04/2025

- **Optimized the core trading platform in React** by integrating **WebSockets**, eliminating performance bottlenecks, preventing memory leaks, and applying smart **data chunking** to handle large real-time datasets — resulting in **20% faster load times and 40% fewer UI bugs**.
- **Mentored a team of 4 junior developers**, standardizing best practices in React, JavaScript, and debugging workflows; all became independent contributors within 6 months, increasing team velocity and code quality.

Software Developer 1

- **Owned end-to-end development of 9+ user-facing products** (onboarding flows, dashboards, IPO & debt platforms) using **React, JavaScript, Bootstrap, CSS**, and **CouchCMS**, driving **~60% of daily user interactions** on the platform.
- **Delivered pixel-perfect, production-ready UIs** by converting Figma designs into responsive, performant frontends using **CSS, Bootstrap, and Ant Design**, while collaborating cross-functionally to meet aggressive delivery timelines.

Frontend Developer, *Diy.org* 08/2021 – 12/2022 | Abu Dhabi, UAE

Tech Stack: React.js, React Native, TypeScript, JavaScript, Redux, GraphQL, REST APIs

Product Focus: Learning platform tailored for young learners

- **Delivered improved user retention** by building responsive, pixel-perfect UIs, enhancing navigation flows, and redesigning onboarding experiences using **React, React Native, TypeScript, Tailwind, MUI, and Bootstrap**, supported by performance profiling and optimization.
- **Enhanced content delivery performance** by integrating **GraphQL**, optimizing REST API consumption, refactoring Redux data flows, and minimizing unnecessary re-renders through memoization and lazy loading.
